
2020 INFLATION-ADJUSTED RETIREMENT PLAN AMOUNTS

The Internal Revenue Code (IRC) provides for dollar limitations on benefits and contributions under qualified retirement plans. It also requires that the IRS Commissioner annually adjust these limits for cost-of-living increases. The following information consists of limitations on various types of retirement plan provisions that have been inflation-adjusted for 2020. Please note that some of these amounts remain unchanged from 2019. The section of the IRC from which the limitation is outlined is referenced in parenthesis.
